NEW HIGH-PERFORMANCE OSCILLOSCOPES

3.5-μsec Risetime

In addition to a fast-rise vertical-deflection system and high-speed sweeps, these two new Tektronix Oscilloscopes have the dc-coupling, high sensitivity, slow sweeps, and versatile triggering needed for most general-purpose laboratory work.

The vertical amplifier used in the Type 581 and Type 585 requires a new kind of plug-in unit. Tektronix Type A to Z Units cannot be used in these instruments. Although only one of the new plug-in units (Type 80) is available as this catalog goes to press, other plug-in units are in development.
